

PRODUCTS FOR QUALITY WATER

2510 CONDITIONER

AUTOMATIC WATER CONDITIONER

WATER CHEMISTRY SOFTENERS SAVE YOU MONEY AS THEY MAKE WATER SOFTER FOR ALL YOUR USES

Water Chemistry offers the soft, luxurious touch of conditioned water which adds so much to the quality of your life, as well as saving you money.

Some of the benefits of conditioned water are naturally smooth skin because your skin rinses clean without soap residue, plus it leaves hair smooth and silky.

With **Water Chemistry** softened water, laundry comes out cleaner, fabrics look brighter and feel softer, making clothes last longer.

Savor flavors as they were meant to be with **Water Chemistry** conditioned water. Beverages, soups, foods taste fresher — and ice cubes are better because the iron and manganese are removed.

Hot conditioned water cleans dishes, glassware and silverware completely, leaving them sparkling and detergent-free.

Water Chemistry softened water enables you to use less soap and detergent, saving you money and helping the environment. Plus, a **Water Chemistry** softener prevents the build-up of harmful mineral scale, adding years to pipes, appliances and hot water heaters.

AUTOMATIC CONTROLLER

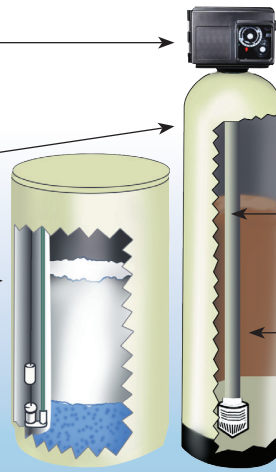

Available in calendar clock, metered and micro-processor models.

STURDY FIBERGLASS REINFORCED TANK

Strong, non-corrosive tank prevents leaks.

DURABLE POLY BRINE TANK WITH SAFETY FLOAT

Poly tank is non-corrosive for long life and the safety float for positive shut-off.

HIGH FLOW INTERNAL DISTRIBUTOR

Piping is one inch O. D. to provide you with the highest flow rates.

HIGH QUALITY ION EXCHANGE RESIN

High capacity resin for use on chlorinated and non-chlorinated water.

2510-3200 Metered EcoMinder Softener Valve

MODEL #	CU.FT. RESIN	CAPACITY IN GRAINS				TANK SIZES		FLOW RATES	
		MAX	SALT	MIN	SALT	MINERAL	BRINE	IN GPM	
R25MS948	1.0	30	15	24	9	9 X 48	14 X 14 X 34	9	10
