

- Leak-proof sealing with top-seated Buna-N o-ring

## - Available with clear and blue sumps

Valve-in-head (VIH) housings incorporate the same rugged design and application features as our Standard 3/4" NPT housings.

The internal valve-in-head allows both inlet and outlet ports to be simultaneously shut-off with a half turn of the handle. This eliminates the need for external shut-off valves. Radial sealing o-rings and sealing surfaces are continuously cleaned each time the valve is used, ensuring leak-proof operation.

Valve-in-head filter housings are available in both 10 " and 20 " lengths, will accommodate a wide range of $2 \frac{3}{} /{ }^{\prime \prime}$ to $27 / 8^{\prime \prime}$ diameter cartridges and are available with either reinforced polypropylene or clear FDA-compliant StyreneAcrylonitrile (SAN) sumps.

Pure Quality.'
